# RAJESH KARTHIK

Technology Delivery & Transformation Leader | IT Program & PMO Leadership | SAP S/4HANA, Cloud, AI & IoT

Singapore | +65 9116 2719 | rrajeshkarthik@gmail.com | LinkedIn | www.rajeshkarthik.com

## PROFESSIONAL SUMMARY

Technology Delivery & Transformation Leader with 24+ years of experience owning the delivery of large, complex IT programs and driving organizational and technology change across SAP S/4HANA, GenAI/AI, Cloud, IoT, Big Data, and IT Security. Combines program and PMO leadership (governance, portfolio, vendor, budget, and risk management) with hands-on depth in architecture, system integration, and implementation, guiding engineering teams from solution design to production. Backed by a Ph.D. in Industrial IoT and a B.E. in Computer Science, with a proven record of delivering multi-million-dollar initiatives across multi-vendor, multi-cultural global teams with measurable business outcomes.

**Target Roles**: Head of Digital Delivery | Director of Technology Delivery | Head of Transformation | Technology Delivery & Transformation Leader | Head of PMO / Portfolio Lead | Senior Technical Program Director | Digital Transformation Lead

## KEY ACHIEVEMENTS

- Led agile delivery of enterprise SAP S/4HANA Order-to-Cash transformation, implemented Way-of-Working, Reducing time-to-market by approximately 25%.
- Coached and stabilized 20+ engineering teams on agile and DevOps practices, improving delivery predictability and stakeholder satisfaction.
- Delivered global IT Security & Compliance platform built on Big Data, Cloud, and ML/GenAI, providing a single source of truth for asset inventory.
- Directed ASEAN HR digital transformation, delivering a self-service portal with workflow automation that significantly reduced manual effort and improved data quality.
- Owned delivery of multi-million-dollar, multi-vendor IT programs with distributed engineering teams across Asia and Europe, covering scope, budget, risk, and governance.
- Mentored project managers and agile practitioners and built an agile co-learning community, strengthening delivery and PMO practices across the organization.

## CORE COMPETENCIES

**Program Delivery, PMO & Governance**: Large-Scale IT Programs | Program & Portfolio Management | PMO Setup & Governance | Delivery Standards & Reporting | Multi-Vendor Management | Budget & Resource Planning | Risk & Dependency Management | Executive Stakeholder Management

**Technical Leadership & Architecture**: Solution Architecture | Enterprise Architecture | Technical Design Reviews | System Integration | API & Integration Design | Cloud-Native Design | Technical Roadmaps|Build-vs-Buy Evaluation

**Digital Transformation**: Organizational Change Management | Transformation Roadmaps | SAP S/4HANA Implementation | Cloud Migration | Legacy System Modernization | Digital Process Automation | Industry 4.0

**Agile, DevOps & Engineering Delivery**: Agile Coaching (20+ Teams) | SAFe Implementation | CI/CD & Test Automation | DevOps Practices | Scrum Master Mentoring | High-Performance Team Building

**Technology Domains**: Big Data Analytics | Machine Learning | GenAI / LLM Applications | Cloud Platforms | IoT/IIoT Solutions | IT Security & Compliance | Data Privacy | Cyber Security

## PROFESSIONAL EXPERIENCE

**Robert Bosch Southeast Asia Pte. Ltd. | Singapore**

*Technology Delivery & Transformation Leader (Senior Project Manager)* | Dec 2018 – Present

Own end-to-end delivery and lead transformation of large, complex IT programs across SAP S/4HANA, cyber security, compliance, GenAI, IoT, and cloud domains. Combine program governance with hands-on architecture and integration decisions, leading multi-vendor, global engineering teams on multi-million-dollar programs.

**Key Programs & Achievements:**

***SAP S/4HANA Digital Transformation Program***

- Served as technical and agile lead for enterprise SAP S/4HANA design and build supporting Order-to-Cash modules across global operations; drove Fit-to-Standard workshops and solution design decisions with architects and vendors
- Transformed waterfall-based SAP implementation into an agile, sprint-based delivery model with iterative build-test cycles and test automation, enabling faster time-to-market and improved stakeholder engagement
- Aligned IT, business units, and external vendors on technical scope, interfaces, and data flows in support of Industry 4.0 objectives
- Delivered modular, flexible S/4HANA architecture following clean-core principles and API-based integration, supporting business continuity and data-driven decision-making

***IT Security & Compliance Program - Asset Inventory Solution***

- Led global IT security program architecting a centralized asset inventory platform on Big Data, Cloud, and GenAI technologies, ingesting data from multiple network and security sources
- Created single source of truth for network-connected assets across the organization, enabling cyber security threat detection and response
- Designed and deployed Machine Learning models for automated IT asset detection and classification, supporting Enterprise Cyber Security
- Implemented organization-wide device inventory service with REST APIs for querying and storing assets, ensuring compliance with security guidelines
- Delivered solution strengthening cyber security posture and enabling proactive threat management through data-driven asset visibility

***Product Compliance Management System (PCMS) Digitalization***

- Led digitalization initiative building a single source of truth for product compliance across global Bosch entities, including data model and integration architecture
- Implemented GenAI-based dashboards for Board of Management on compliance programs across the enterprise, combining LLM capabilities with governed enterprise data
- Built automated compliance reporting tooling and data pipelines to identify and prevent compliance issues at scale
- Ensured secure integration with source systems while maintaining data protection, access control, and security guidelines
- Developed adapted organizational processes and IT tools for all compliance-relevant entities

***ASEAN HR Process Digital Transformation***

- Directed digitization and automation of HR processes across the ASEAN region, defining target architecture and integration with HR systems
- Led cross-functional team delivering an internet-accessible self-service HR portal with workflow automation
- Achieved significant reduction in manual effort, improved data quality, enhanced UX, and standardized processes across ASEAN
- Built autonomous, high-performing engineering teams focused on business value delivery

***IoT Development Environment Program (Mac@Bosch)***

- Executed rollout of macOS development environment as a managed service for IoT and software developers, including standardized configuration, automated provisioning, and security compliance
- Increased developer satisfaction and efficiency by introducing modern development platforms
- Managed end-to-end deployment including service portal integration and procurement processes
- Coached and stabilized agile and DevOps practices across 20+ teams; trained new Scrum Masters and Product Owners
- Established vibrant agile co-learning community with monthly meetups
- Mentored project managers and agile practitioners across the organization; contributed to PMO standards, delivery governance, and project management best practices
- Successfully managed projects in complex organizational structures with multi-cultural virtual teams

**Mercedes Benz Research & Development Centre | Bangalore, India**

*Technology Delivery Lead – Connected Cars (Senior Program Manager)* | Jun 2018 – Dec 2018

- Led technical delivery of Connected Cars program including Mercedes Me portal, mobile app, and remote vehicle control functionalities (cloud backend and vehicle-to-cloud integration)
- Drove rollout of Mercedes Connected Car platform to the Indian market, covering backend deployment, integration, and release readiness
- Built and coached agile development teams while implementing test automation, CI/CD, and DevOps practices
- Coordinated cross-functional engineering teams ensuring timely delivery of customer-facing digital products

**Bosch Global Software Technologies Private Limited | Bangalore, India**

*Technology Delivery Lead – IoT Practice & Competency Lead (Senior Program Manager)* | Apr 2014 – Jun 2018

Led enterprise IoT practice development and agile transformation, architecting Industry 4.0 solutions across eMobility, Manufacturing, Retail, and energy sectors.

**Key Achievements:**

- Architected and delivered IoT platform and multiple Industry 4.0 solutions, from device connectivity to cloud analytics
- Built IoT Energy Analytics platform processing real-time streaming data from connected devices
- Established competence center for Industry 4.0 technologies, defining reference architectures and technical standards
- Designed and enabled cloud-based solutions for smart cities and IoT products across diverse sectors
- Developed big data processing and analytics platforms integrated with IoT data streams
- Implemented real-time monitoring and asset management solutions in manufacturing environments
- Delivered cloud-based smart retail systems with IoT sensor integration

**Robert Bosch GmbH | Stuttgart, Germany**

*IT Business Integration Manager - Diesel Systems* | Jun 2012 – Mar 2014

- Led cross-departmental systems integration projects within Diesel Systems division
- Created comprehensive project plans covering timelines, budgets, and resource allocation
- Identified business process and system integration opportunities, defining interface and data-flow requirements across the IT landscape
- Facilitated management strategies and trained staff on new integrated systems
- Managed vendor relationships and ensured compliance with regulatory standards

**Bosch Global Software Technologies Private Limited | Bangalore, India**

*Project Manager & Technical Lead - Enterprise Applications* | Jun 2007 – May 2012

- Led development of enterprise portal platform serving as front-end for Bosch Global Networks
- Led Management Information Systems project supporting HR, financial, logistics, and quality management modules, including data integration and reporting
- Served as Technical Lead for Workflow Management Platform, driving architecture and implementation of 45+ business processes globally
- Delivered Invoice Processing Solution (FAST) providing end-to-end financial document processing services

## EDUCATION

Ph.D. in Management - Industrial Internet of Things | Alagappa University, India | 2022
Master's in Business Administration (MBA) in Information Systems | Bharathidasan University, India | 2009
Bachelor of Engineering (B.E) in Computer Science & Engineering | Bharathidasan University, India | 2001
Diploma in Computer Technology (D.C.Tech) | Department of Technical Education | 1998

## CERTIFICATIONS

- Project Management Professional (PMP)
- Certified Scrum Master (CSM)
- Generative AI Leader Certification from Google
- AWS Certified AI Practitioner (AIF-C01)
- Scaled Agile Framework (SAFe) Certified Agilist
- Certified Product Manager (Lean Product Management)
- Agile Enterprise Coach (ICP-ENT)
- Lean Product Management
- BOSCH RK-PMQ Certified

## TECHNICAL PROFICIENCIES

**Methodologies:** Agile/Scrum, SAFe, DevOps, CI/CD, PMO Governance, Portfolio Management, Lean Product Management, Waterfall
**Architecture & Engineering:** Solution & Enterprise Architecture, System Integration, API Design, Data Pipelines, Cloud-Native Design, Test Automation, Technical Governance
**Platforms & Technologies:** SAP S/4HANA, Cloud Platforms & Cloudification, Big Data Analytics, Machine Learning, GenAI/LLM Applications, IoT/IIoT Platforms, Enterprise Portals
**Domains:** IT Security & Compliance, Data Privacy, Digital Transformation, IoT, Industry 4.0, Connected Devices

## LANGUAGES

**English (Fluent) and German (Basics A2.1)**
